Title: NESHAP for Asbestos (Renewal)

ICR Numbers: EPA ICR Number 0111.13, OMB Control Number 2060-0101.

ICR Status: This ICR is scheduled to expire on June 30, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 61, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 61, subpart M.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average two hours per response. “Burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously-

applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of demolition and renovation of facilities; the disposal of asbestos waste; asbestos milling, manufacturing and fabricating; the use of asbestos on roadways; asbestos waste conversion facilities; and the use of asbestos insulation and sprayed-on materials.

Estimated Number of Respondents: 9,517

Frequency of Response: Initially, occasionally, and semiannually

Estimated Total Annual Hour Burden: 226,407

Estimated Total Annual Cost: \$21,694,083, which includes \$21,694,083 in labor costs exclusively; there are neither capital/startup nor operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated labor hours from the most recently approved ICR. The decrease is due to a mathematical correction in the previously approved ICR, which overestimated the burden for the respondents. However, there is an overall increase in labor costs to the respondents due to an increase in labor rates.

There is an increase in Agency hours and costs from the most recently approved ICR. The increase is due to a growth in the respondent universe in the past three years, and labor rate increases. This ICR uses updated labor rates for each of the three labor categories when estimating burden costs.
